About

virtual classroom training

Training Bytesize have been successfully delivering virtual classes to delegates all over the world for many years now. The platforms we use, alongside our excellent trainers, enable classroom-style training to be delivered to learners wherever you may be based and without the need to travel.

Over the years we have discovered that virtual training is very different to face to face training, so we have adapted and honed our traditional classroom courses to ensure they are successfully delivered into a virtual environment.

How it works

In a virtual classroom, the trainer will deliver accredited and certified learning directly to you from your computer, phone or tablet at a set time. You simply log onto the course over the internet rather attending a physical location and, thanks to the excellent setup we offer, it will feel like you're in a normal classroom.

Students can ask questions using a headset, webcam or a chat window, and get their questions answered, just like in a traditional classroom. Questions can be lined up and answered at intervals, without interrupting the teacher's flow of thought.

There is no difference in the level of interaction – in fact distractions are significantly reduced because of this way of teaching.

About the virtual platform

There are no requirements made of delegates; in exactly the same way you would turn up to a physical location for classroom training, you simply log on to the chosen platform at a set time and date using secure details which we send prior to the training.

We have premium accounts for GoToMeeting, Zoom and Teams, all of which are free to download and easy to use from your point of view.

What you can expect from virtual classroom training

Pre-course materials

As with all delegates who study a course with us, either in a physical or virtual classroom, there is an element of pre-course learning. We will email this to you before hand.

Our trainers

The trainers we work with to deliver virtual classroom training are all well-versed in the platforms and run sessions with confidence. They are skilled at keeping learners engaged and involved, using breakout rooms, quizzes, polls, and group discussions to immerse the delegates in their learning.

All our trainers have a minimum of 10 years training experience, plus have previously run and managed live projects, so have real-life experience they bring to the virtual session.

Pass rates

We are very proud of our high pass rates for the courses we offer. We have refined our style when it comes to delivering virtual learning and are delighted that our pass rates for virtual training courses are in-line with the pass rate for classroom training; you will see no change in your ability to pass the exam.

Taking your exam online

As with everything we do at Training ByteSize, we support our learners through every single step of their learning. We offer interactive guides to taking your exam online and we will support you to ensure you are in the perfect position to prepare for and take your online exam.

Reviews and feedback from the virtual classroom

Julian from WSP

"The Training ByteSize materials - course book, online learning and virtual workshop - were clearly presented and well structured, giving me the knowledge and confidence to tackle the APM PMQ exam. Terry Kent was an engaging and encouraging trainer who led our online workshops with flexibility and good humour."

Martin from Costain

"The content was very good. The trainer delivered the virtual course well, as he knew what he was talking about and was keen to help people who did not understand (he made great emphasis on helping everybody). A well delivered, enjoyable couple of days online where I feel I have benefited from it."

Weronika from Mott Macdonald

"It was great virtual training delivered in a very professional manner with good pace. The trainer was very approachable and was addressing all our comments/observations/questions. He used the flip charts and that was really helpful in using a systematic approach. I appreciate that the real life examples were used as well and the trainer engaged all the group members well and challenged our thinking as went through the training materials. To sum up: highly recommended course and highly recommended trainer."

Ahmed, an individual learner

"I definitely recommend Training Bytesize to anyone thinking of taking a course for the CP3P exam. I honestly think they are one of the best organisations offering this training. Their virtual training is very professional and convenient. The trainer was knowledgeable and did everything he could to ensure that everyone understands the topics covered and felt prepared for the exam."

Accredited training with exceptional pass rates. Delivered online, in the classroom, blended or virtually.
